

<b>Data</b>	86
Collecting data	0
Creating data	27
Manipulating data	0
Analyzing data	31
Visualizing data	36
<b>Modeling and simulation</b>	97
Designing computational models	32
Constructing computational models	18
Assessing computational models	27
Using computational models to find and test solutions	13
Using computational models to understand a concept	7
<b>Computational problem solving</b>	67
Preparing problems for computational solutions	0
Choosing effective computational tools	0
Assessing different approaches/solutions to a problem	9
Creating computational abstractions	22
Developing modular computational solutions	0
Programming	21
Troubleshooting and debugging	24
<b>Systems thinking</b>	67
Defining systems and managing compelxity	0
Investigating a complex system as a whole	13
Understanding the relationships within a system	13
Thinking in levels	18
Communicating information about a system	23
